The Benefits of Planting Trees

For more information, visit our website at:
<https://forestry.hartfordgis.hub.arcgis.com/>

Flooding

In 2024, Hartford experienced extreme heavy rainfall that led to severe flooding.

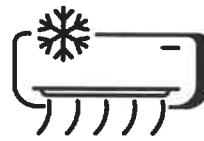

A single **tree** can intercept and store over 100 gallons of water & reduce flooding from storms.

Temperature

In the summer, Hartford is up to 19 degrees hotter than the surrounding cities and towns.

Trees help reduce the air temperature.

Energy Cost

Hartford County residents spend, on average, about \$310 on air conditioning.

Trees help reduce costs to cool apartments/homes

Air Quality

Hartford has one of the highest rates of asthma-related hospitalizations in Connecticut.

Trees improve respiratory illnesses like asthma & COPD by cleaning the air.
